

SGC SGE

Stainless Steel Planetary Gearboxes

Specially developed precision in-line servo gearboxes designed for environments requiring high-level corrosion protection.

Target Industries:

- Food and beverage
- Pharmaceutical and Chemical
- Biotechnology
- Aerospace
- Anti-magnetic applications

Key Features:

- High-quality stainless steel build.
- Outstanding corrosion resistance, specifically for wash-down environments.
- Smooth appearance to prevent debris buildup.
- Permanent laser engraving for clear labeling.

Customization & Protection:

- Available with high-level IP (Ingress Protection) ratings.
- Surface treatments available for high-temperature, pressure wash-down, or hygienic environments.

Contact for further information regarding specific customized requirements.
